

## **The Great Mother**

**Once upon a time, there was a poor mother living by the sea. She used to work as a tailor and sell clothes in the town so that she could raise her blind son. She did everything to make her son happy.**

**She was very sad because her blind son cannot study at school like the other children. One day, she decided to travel to the city with her son to look for the best doctor who can treat him.**

**Finally, she found the best doctor and asked him to help her cure her son. The doctor said that there was only one way to make the child see again which is transplanting eyes.**

**The mother decided to donate her eyes to her son. The doctor did the surgery and it was successful. The mother was very happy because her son will see her again and be able to study at school.**
